ROOM 2 STATISTICAL INVESTIGATIONS

Dear Parents/Caregivers

For the next two weeks we will be learning about statistics and how to make a statistical investigation.

Our specific learning outcomes are to ...

1. sort objects into categories for display.
Discuss and justify their choice.
2. make a display of the data collected (pictograph).
3. make statements about data displays.

Today we had a brainstorm of possible topics to investigate.

Here are some of the ideas ...

- toys
- food in our lunchboxes
- how we get to school
- how we can make our school environment more exciting.

If you wanted, you could ask your child what they have been learning about for maths. For example ...

What question did you investigate today?

What kind of graph did you make at school? What did your graph show?

Please could your child bring their favourite toy to school tomorrow or Thursday so we can photograph it.

Kind regards

Diana and Sarah
